'Vivienne', said Hartley, looking at her pleadingly, 'you did not answer my last letter. It was only by nearly a week's search that I found where you had moved to. Why have you kept me in suspense when you knew how anxiously I was waiting to see you and hear from you?' The girl looked out the window dreamily.

'Mr. Heartly', she said hesitatingly, I hardly know what to say to you. I realize all the advantages of your offer, and sometimes I feel sure that I could be contented with you. But, again, I am doubtful. I was born in a city girl, and I am afraid to bind myself to a quiet sub urban life'.

1) Why did Hartley come to Vivienne? 2) What was Hartley waiting for?

3) Where was Vivienne born? 4) What is Vivienne afraid of?

5) Write an antonym to "advantage".

I do not know which of us got into the carriage first. Indeed, I did not know he was in the carriage at all for some time. It was the last train from London to a midland town— a stopping train, an infinitely leisurely train, one of those trains which give you an understanding of eternity. It was tolerably full when it started, but as we stopped at the sub urban stations that travellers Elite head in ones and twos, and by the time we had left the outer ring of London behind, I was alone— or, rather, I thought I was alone.

a) Whom does "he" in the paragraph refer to?

b) What is tolerably full?

c) Which city is referred to in the paragraph?

d) Who is "I" in the paragraph?

e) Write an antonym to "infinitely".

11. A) i. Don't beat about the bush, my dear fellow. Tell me! Annotate.

5 Marks

The Amazon Rainforest is one of the most incredible places on Earth. It covers over 5.5 million square kilometres across nine countries in South America, including Brazil, Peru, and Colombia. The rainforest is home to an estimated 10% of all known plant and animal species, making it the most biodiverse ecosystem on the planet. Some of the amazing animals that live there are jaguars, sloths, monkeys, and macaws. The Amazon is also crucial for producing oxygen, with its plants absorbing carbon dioxide and releasing oxygen through photosynthesis. Unfortunately, the rainforest faces threats from deforestation, logging, and climate change, which harm its delicate balance.

1. Where is the Amazon Rainforest located?
2. What percentage of known species live in the Amazon?
3. Name some animals that live in the Amazon.
4. What important role does the Amazon play in our ecosystem?
5. What threats does the Amazon Rainforest face?
